Gasoline Level Indicator Paste

McCabe Gasoline Indicator Paste is a light sky blue paste that turns a darker blue when immersed in:

- Gasoline
- Reformulated Gasoline (RFG)
- Diesel
- Kerosene
- Naphtha
- #2 heating oil
- Light crude oil
- Jet fuel
- Petrochemicals
- Plant oils

Storage:

Tighten the cap after each use to avoid contamination.

Store between 45 -85 °F / 7 - 29 °C

Shelf Life:

3 years

WARNING:

Can cause serious eye irritation.

Do not get in eyes, on skin, or on clothing.

Wear protective gloves and eye protection.

If on skin on or in eyes, rinse with water for several minutes. Wash contaminated clothing before reuse.

If irritation persists, seek medical attention.

Safety Data Sheet (SDS) under the Product > McCabe Gasoline Level Indicator Paste tab at McCabeAndSons.com, or scan the QR code below.

Scan for
SDS Sheet

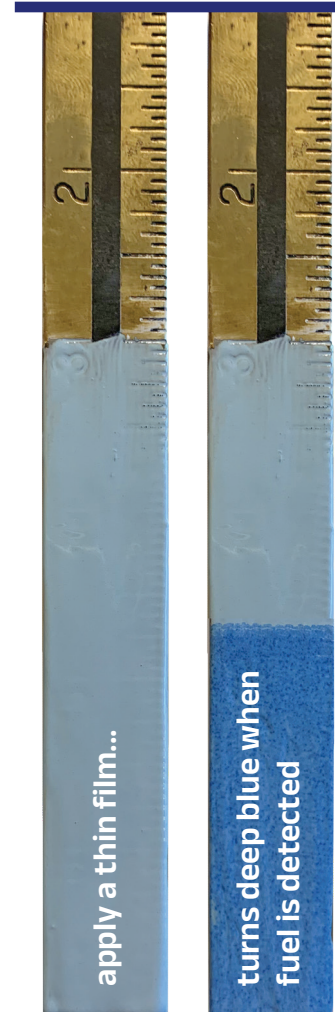

McCabe Gasoline Indicator Paste has a thick, toothpaste-like consistency.

To Use:

Spread a smooth, even coat of the product on the bob or gauging device where you expect the air/product interface to be located.

Once entering the product, leave immersed for approximately five to ten seconds and the paste will turn a dark blue. (Please note: some heavier products may require a longer immersion time.)

When reading the results, note a straight, sharp demarcation on the gauging device, light blue above/ dark blue below.

apply a thin film...

turns deep blue when
fuel is detected
